Cost: \$5 – Pay at Door – Coffee & muffins provided

**RSVP: space is limited; please pre-register by email at: [morning\\_talks@gac-cs.ca](mailto:morning_talks@gac-cs.ca)**

## **Exploring for porphyry copper-gold deposits in the North American Cordillera**

**Discussion Leader: Tyler Ruks, MSc, PhD candidate, Chief Geologist,  
Western Cirque Resources Ltd.**

West Cirque Resources Ltd. (WCQ) is a Vancouver based mineral exploration company, established in 2011, focused on discovering porphyry copper-gold deposits in the North American Cordillera. WCQ has a stable of exploration stage porphyry copper-gold projects located in the prolific Quesnel and Stikine Terranes. Three of these projects, situated in the Red Chris (Imperial Metals Corp.) district of northwestern B.C., were recently optioned by Freeport McMoRan Copper and Gold Inc., the world's largest publicly traded copper-gold company. The talk will provide an introduction to WCQ projects, with emphasis on outlining our exploration models and plans for future work.

A summary of the work and results, ***intended to stimulate discussion of future efforts on the project***, will be presented.
